## Template for Cutting Paper Panels to Fit Lamp Frames

**For a 5" x 8" Paper Fusion™ Lamp,  
fold template to the first dotted line:**

- 1) Fold the template on the first dotted line below.
- 2) Place the folded template on top of the non-decorated side (backside) of the paper panel. Align the top edges of the template and the paper panel, and draw a cut line along the folded edge of the template, marking the total length to be cut.
- 3) Trim each of the decorative papers to your drawn cut line, then glue each trimmed paper to the translucent liner before assembling the lamp.

For 5" x 8" Lamp:  
Cut panel size is  
3.75" x 5.75"

First dotted line ↓

**For a 5" x 11" Paper Fusion™ Lamp,  
fold template to the second  
dotted line:**

- 1) Fold the template on the dotted line below.
- 2) Place the template on top of the backside of the decorative paper panel, aligning the top edges. Draw a trim line along the folded edge of the template directly on the back side of the decorative paper. Repeat for all paper panels enclosed.
- 3) After trimming all four paper panels, glue each paper panel to the translucent liner before assembling the lamp.

For 5" x 11" Lamp:  
Cut panel size is  
3.75" x 8 11/16"

Second dotted line ↓

**For a 5" x 15" Paper Fusion™  
Lamp, trace the entire template:**

Each Paper Fusion Lamp Paper Panel Pack is cut to fit the 5 x 15" lamp with no trimming necessary. To make your own panels for a 5" x 15" Paper Fusion™ lamp, use the entire length and width of this paper template as a tracing guide on the back of your decorative paper or finished artwork.

After trimming all four paper panels, glue each paper panel to the translucent liner before assembling the lamp.

For 5" x 15" Lamp:  
Cut panel size is  
3.75" x 12.5"
